	<p>Resuscitation Council UK Statement: It is likely that a child having an out-of-hospital cardiac arrest will be known to you. We accept that doing rescue breaths will increase the risk of transmitting the COVID-19 virus, either to the rescuer or the child. However, this risk is small compared to the risk of taking no action as this will result in certain cardiac arrest and the death of the child.</p>

4. Tick (✓) if any of the identified hazards relate to any of the following specific themes:

Hazardous Substance	Manual Handling	Display Screen Equip	Fire	Work Equip / Machinery	Stress	Individual Person such as Young Person New/ Expectant Mother or Service User
					✓	✓

If any are ticked a specific risk assessment form must be completed separately. For example a COSHH form must be completed if a hazardous substance is used.

5. Risk Rating

The risk rating is used to prioritise the action required. Deal with those hazards that are high risk first.

Risk Rating	Description	Action Priority
High	Where harm is certain or near certain to occur and/or major injury or ill-health could result	Urgent action
Medium	Where harm is possible to occur and/or serious injury could result e.g. off work for over 3 days	Medium priority
Low	Where harm is unlikely or seldom to occur and/or minor injury could result e.g. cuts, bruises, strain	No action or low priority action

Date Assessed: 01/09/20

Review Date: 01/09/21

7. Communication and Review

This risk assessment should be communicated to all employees and relevant persons who may come into contact with the hazards being assessed. The assessment must be reviewed annually or following a significant change, accident or violent incident.

Actions:

Review bins on site, consider replacing with foot operated.

Keep RA under review with govt guidance. For example, this RA reviewed in the light of the tier 1 – 4 groupings of COVID –19 responses issued by the govt on Friday 29th August 2020.
